COLLEZIONE SPECIALE

ETHICALLY SOURCED • RARE • BEAUTIFUL

who —
WE
— are

what —
WE
— do

Kingdom, a company full of dedicated wood junkies, came to be as part of the FSD Group.

We have been tripping on **wood for 114 years**. We have rolled with the times but we kept wood passion burning by exploring various things till date. Because we know that the only way to keep perfecting wood is by remaining high on it.

We are India's largest wood dealers, with interests in wood, wood-based raw materials such as Timber, Decking, Sliced Natural Veneer, Dyed Veneer, Reconstituted Veneer, Wood Slabs, Wooden Flooring, and Decorative panels.

We have 3 warehousing facilities of which 2 in India and 1 in Dubai with total of 5 million sq. mtr Veneer flitch stock. We regularly **export our veneers worldwide from our Centralised Dubai Warehouse** to leading wood veneer distributors, furniture companies, and project owners.

Sliced Natural Veneer In woodworking, Veneer refers to thin slices of wood, of which thickness usually ranges between 0.3mm to 3mm of the popular species such as Oak, Walnut, Cherry, Ash, Beech, Maple, Birch, Rosewood, Sycamore, Sapeli, Mahogany, Koto, Makore etc. Veneer is obtained by 'peeling' the trunk of a tree. The appearance of the wood grain and figure comes from slicing through the growth rings of a tree and depends upon the angle at which the wood is sliced. If you are wondering how a particular grain will flow in a log, without compromising on timber, then we are the people you should come to...!

We buy our own Wood Logs directly from Plantation Owners and Custom Cut them in US / EU / Asia and thereby ensure we are **competitive in our product pricing without compromising on quality** at all levels.

Dyed Veneer – We have our own manufacturing factory in India with state of the art European Technology for Veneer Dyeing, to let the natural veneer soak into the color of your choice. Yes, **YOUR CHOICE!**. The dyeing process is by immersion, so the color penetrates and is not eliminated when sanding. The dye bath containing veneer is put into closed pressurized chambers until the wood absorbs the amount of color that is desired. When the color is absorbed the pressure is released and the veneer is removed. The veneer is then washed with water until there is no bleeding and then dried with our Continuous press drying process. **This immersive method results in consistent color not only on surface but also in the veins and complete thickness of the Veneer.**

This Collection is a tribute to all the exotic, rare and unique wood veneer species available around the world. These are ethically sourced and selectively selected to ensure your living space is as Unique as You.

When you witness our Collezione Speciale Natural Wood Veneer range, it will take you to the exotic forests of the world where each of these species grows in very low quantities and is hard to find.

With this collection being used in your living spaces, you will be your neighbor's envy and your family's pride.

So get ready to get Exotic with our *Collezione Speciale* Natural Wood Veneers.

USP

BENEFITS

	Superior Quality	Premium Veneer grade logs are chosen for custom slicing
	Advanced Slicing	Slicing done on most advance machines to get top notch Veneer
	Iron Pressed	Shine on Veneer surface for Premium look and Aesthetic appeal
	True Grading	True grading & True measurement
	Sustainability	Ethically sourced and processed ensuring minimal environmental impact while retaining the beauty of natural wood
	Medley	Vast collection of rare and unique Veneer species
